

Parents and Caregivers of Young Doctors for Life

An incredible, special opportunity is coming to your school in 2026.

We are thrilled to announce that our school has been specially selected for an amazing program offered by **Malpa's Young Doctors for Life** initiative, in collaboration with the **Indigenous General Practice Trainee Network (IGPTN)** – and your child has been chosen to be part of the program!

This exciting program features a short video about what General Practitioners (GPs) and Rural Generalists (RGs) do and how four amazing Aboriginal and Torres Strait Islander GPs/RGs became doctors. Then Young Doctors will participate in a series of fun, hands-on activities that explore what it means to be a GP/RG, what GPs/RGs actually do and how they got to become doctors. It is designed to spark curiosity and open young minds to the rewarding world of a career as a doctor – especially as a General Practitioner or Rural Generalist.

This should be a very stimulating time for your young people and for you, too. The Malpa and IGPTN team would love you to yarn with your child about what this means for them and support them as they explore possibilities. Having someone who believed in them and supported them made all the difference to the Aboriginal and Torres Strait Islander GPs/RGs in the video. This is a once-in-a-lifetime spark that could light the imagination about what their future could hold.
